Education

Technical University of Ilmenau

Ilmenau, Germany

Master of Science: *Research in Computer and System Engineering*

October 2018 - Present

- Coursework: Information System, Software and System Engineering, Software Architecture, Algorithms, Complex Embedded System.
- Research seminar topic: **Face detection integrated with Viola Jones algorithm.**

BRAC University

Dhaka, Bangladesh

Bachelor of Science: *Computer Science*

January 2010 – March 2016

- **Thesis paper published in IEEE conference iCEEICT 2016 International (Acceptance rate 30%, Paper ID: 1411)**
- Coursework: Algorithms, Data structures, Artificial Intelligence, Computer Architecture, Discrete Mathematics, Database, Software engineering, System Analysis and Design, Operating system, Android programming.

Work Experience

Cuculus GmbH

Erfurt, Germany

Internship | Data analyst

November 2019 – June 2020

Completed a project for Time Series forecasting based on large data set of electric load values.

- Worked with SARIMA model to forecast with Python.
- Developed a Data scraping and data cleaning method for extracting load values.

TSI- Technology for Social Impact

Dhaka, Bangladesh

Software Engineer | Technology Team

January 2017 - August 2018

Worked as both front-end and back-end developer.

- Developed robust CRM products.
- Modified existing software to correct errors, upgrade interfaces and improve performance.
- Research and development for new systems and optimal solution for a problem.

UNESCO/POLAND Research Fellowship for Engineering 2017A

Krakow, Poland

AGH University of Science and Technology

October 2017 – March 2018

Research fellow

Collaborated with faculties of metallurgy department of AGH University of Science and Technology to advance research and gain deeper understanding of topics.

- Conducted data analysis studies which led to the development of mathematical modelling of a system which predicts movements of steel inclusions in steel making process.
- Selected for a competitive research fellowship program for representing my country amongst researchers applying from 42 different countries.

- Developed a CRM web applications for acquiring data from customers and giving them solutions.
- Developed work-flow charts and diagrams to ensure production team compliance with client deadlines.

Skills

- JAVA, AngularJS, Angular material, JavaScript, Python.
- Familiar with SQL, PHP, Android Programming.
- Experienced with SVN, Git, JIRA.
- Debugging proficiency and UX/UI understanding.

Projects

- Automated System for Detecting Jute Plant Disease Using Image Processing and Machine learning integrated Multiclass SVM with mobile application (Android).
- Inventory management system of a super shop using MySQL and PHP.
- A mathematical modeling of the physical and chemical processes taking place with the participation of steel and a continuous casting mould slag.
- Real time hand gesture detection using Image processing for controlling the movement of industrial crane.

Other Activities

- Mentored students with programming assignments and giving the basic knowledge of data structure while my undergraduate studies.
- Awarded with Government Scholarship on the basis of excellent result in Secondary School Certificate.
- Gained an enriching experience both culturally and scientifically while working and living with researchers from all around the world.
