

PROFILE

Experienced electronic engineer specializing in digital circuit design, microcontroller programming, and FPGA
Experience in programming languages: C, C#, VB, VHDL, assembly

CONTACT

Via Catania, Verona, 37138, Italy

Phone: +39 338 893 1092

Email: mokhtari.bas@gmail.com

ALI MOKHTARI

Computer Hardware

EDUCATION

University of Verona, Italy

Ph.D. in Computer Science - Robotics
Sep 2023 - Present

University of Verona, Italy

Master in Industrial Robotics (Unfinished)
Nov 2022 - Mar 2023

Iran University of Science and Technology, Tehran

Ph.D. in Computer Architecture Systems (Unfinished)
Sep 2015 - Sep 2022

Islamic Azad University of Arak, Iran

Master in Computer Architecture Systems
Sep 2008 - Feb 2011

Islamic Azad University of Arak, Iran

Bachelor in Computer Hardware Engineering
Sep 2002 - Dec 2007

WORK EXPERIENCE

Soluzione Solare S.R.L., Vicenza

Hardware Developer

Feb 2023 - Present

- Design and implementation of sunlight and air temperature measurement sensors in the renewable energy Hardware Developer

Nivar Sanat Azma, Tehran

Jun 2019 - Dec 2022

- Design and replacement of failed aircraft system components for reuse.

Dena Samane Pars, Tehran

Hardware Developer

Jun 2019 - Dec 2022

- Design and implementation of control and monitoring systems for telecommunication.
- Developed a signal processing simulator for analog IF signal generation.

Fanavaran Mojpardaz Danesh Pajooh, Tehran

Hardware Developer

Dec 2017 - Jul 2019

- Designed and implemented digital and analog control circuits for real-time applications using FPGA.

Teyf Ertebat Jonob, Tehran

Hardware Developer

Sep 2015 - Dec 2017

- Upgraded legacy analog systems with modern digital circuits for improved performance.

Basamad Azma, Tehran

Hardware Developer

Jun 2011 - Jul 2017

- Designed and implemented digital control circuits for telecommunications.

SKILLS

- Programming Languages: C, C++, VHDL, C#, VB
- Software & Tools: Altium Designer, Microsoft Office, ISE, Visual studio, MPLAB ...
- Electronics: Circuit design, PCB design, FPGA programming ...
- Other: Effective time management, teamwork, fast learning ...

LANGUAGE

- Persian: Native
- English: Good

PUBLICATIONS

- Mokhtari, A.; Maris, B.M.; Fiorini, P. A Survey on Optical Coherence Tomography—Technology and Application. *Bioengineering* **2025**, *12*, 65.
<https://doi.org/10.3390/bioengineering12010065>
- Ali Mokhtari, Peyman Kabiri, "A New Multi-Valued Logic Buffer and Inverter Using MOSFET Based Differential Amplifier", *International Journal of Engineering (Transactions A: Basics)*, Vol. 35, No. 1, Materials and Energy Research Center, January 2022, (DOI: 10.5829/IJE.2022.35.01A.14). (ESCI JCI for 2020: 93.169)
- MOKHTARI, Ali and [KABIRI, Peyman](#) (2018). A Seven-Valued Full Adder/Subtractor Architecture. In: *3rd International Conference on Electrical Engineering*. Tehran-Iran.
- [KABIRI, Peyman](#) and MOKHTARI, Ali (2018). A Novel Seven-valued Buffer. In: *Proceedings of 3rd National Conference on Electrical and Computer Engineering (TEC-2018)*.
- Several papers under review on Multi-Valued Logic Circuits.

PROJECTS

- Real-time Control & Monitoring of RF Devices - DDS, PLL, AGC, STC, LO
- Servo Motor Control - DC & 3-phase servo motor systems
- Module & Device Testing - RF and servo system module testers
- Reverse Engineering of Legacy Systems - Aircraft monitoring computers and displays
- Data Logger & Commander - Analog-digital data logging and command simulation
- Miscellaneous - LCD & VGA drivers using FPGA, Ethernet & serial communication I2C, SPI, UART...
- and many other small projects
